

TIBURON EXPLORER TRIP INFORMATION

What is the ship like?

The **M/V Tiburon Explorer** spaciouly accommodates 16 passengers in 8 cabins, all of which have private bathroom facilities and can be configured to accommodate a couple (with a queen bed) or two singles. Staterooms 1-6 are located on the main deck with staterooms 7-9 located on the lower deck.

The top deck is the sun deck, offering both shaded and full-sun areas for relaxation as well as a jacuzzi and the bridge. The large main deck contains the air-conditioned dining and lounge area, multimedia system with TV/DVD/CD, common restroom, and staterooms 1-6. Double doors open to the ample dive platform. The lower deck is accessed via stairs from the salon.

The **Tiburon Explorer** is equipped with a wireless signal that will allow communication via WhatsApp. Cell phone service is available when in proximity to Santa Cruz Island if your phone is so equipped. The vessel's location does determine the reliability of access to these services. A satellite phone is available for emergency use.

What are the diving conditions like?

Galapagos is famous for huge schools of hammerheads, but there is more to Galapagos than just its schooling sharks. You will be diving in a protected and healthy marine environment with an abundance of rare species including Galapagos sharks, whale sharks, mantas, mobulas, eagle rays, stingrays, penguins, orcas, dolphins, mola mola, marine iguanas, turtles, sea lions, butterflyfish, tuna, and pufferfish among many others.

Galapagos has two seasons. High season is regarded as July to November when the Humboldt Current is at its maximum force, bringing upwelling's of nutrients from the cold depths. This is your best opportunity to dive with whale sharks in Darwin and Wolf. In these months, the water is cooler, visibility is lower, currents can be stronger and the seas can be rough at times. The air temperature is cooler and evenings can be fresh.

The chances of seeing whale sharks are slim during the low season months of December through June. Other popular species, such as the scalloped hammerheads and large schools of fish are present year-round however, making the "low" season desirable if whale sharks are not on your must-see list. Temperatures are warmer and visibility is generally better.

Galapagos is a cold-water destination. Regular temperatures in Darwin and Wolf are 12-14 C (70-74°F) but can be warmer in the early months of the year. Thermoclines can dip to 13C (54° F) in the Western Islands of Punta Vicente Roca and Cabo Douglas, which stay cooler year-round.

What are the diving logistics?

All dives aboard the **Tiburón Explorer** are offered at scheduled times, up to 4 times daily (weather & itinerary permitting). Schedules must comply with Galapagos National Park rules, allow for adequate surface intervals and enable the vessel to travel to different locations. Please note that Galapagos regulations limit the maximum depth for all dives to 130 feet (30 meters). All dives are done from pangas (zodiacs).

What is the minimum age for divers?

The minimum certifiable age for divers is 10 for most SCUBA certification agencies; normally, the agencies restrict 10 and 11-year olds to a maximum depth of 40 feet (12 meters). Children 12-14 years old are restricted to 70 feet (21 meters). **Tiburón Explorer** therefore allows children as young as 10 years to participate in our trips, with the following restrictions:

1. All children under the age of 15 must travel and dive with their parent or guardian, unless undergoing active training with an instructor. A guardian must accompany minors onboard at all times.
2. This itinerary offers no diving opportunities at depths less than 40 feet; **diving opportunities for 10 and 11-year olds are not available on this itinerary, and 12-14-year olds will not be able to dive all sites.** For this reason, a minimum age of 15 for divers is strongly suggested.
3. A parent/legal guardian will be required to sign the liability release on behalf of a child under the age of 18.

What are your safety standards?

To ensure your safety, we require the following of all divers:

1. All divers must be certified as open water scuba divers by an internationally recognized certification organization.
2. All divers must be experienced divers (we recommend that you have more than 100 logged dives) and have logged at least one dive within the 6 months prior to boarding the vessel. Dives are very often at an advanced level. Currents can be very strong and often divers are required to swim against them.
3. All dives are guided by an instructor/naturalist guide and due to Galapagos National Park regulations all divers must dive with the guide at all times.
4. All divers must log in and out of the water with a member of the diving staff.
5. All divers must have a submersible console. In addition, a timepiece must be worn by at least one diver in a buddy team. Dive computers are required.
6. Decompression and solo diving are not allowed under any conditions. The maximum allowed depth is 130' (110' on nitrox).
7. Diving activities must cease when the consumption of alcohol begins.
8. All divers must present proof of dive accident insurance per Galapagos National Park regulations.
9. All divers must also carry a DiveAlert, a surface signaling device, and an electronic beacon while diving (all available on board). Guests are responsible for all items they borrow from the vessel.
10. Please note that due to a combination of staff and equipment logistics, insurance requirements and local diving regulations, neither rebreathers nor diver propulsion vehicles (DPVs) may be used aboard **Tiburón Explorer**.
11. Please note that flash photography is not permitted while taking photos of wildlife on land. Professional photography and videos recorded for commercial purposes must be authorized by the Galapagos National Park Directorate. Drones are not permitted in the Galapagos.

DIVE INSURANCE IS REQUIRED !

Due to the nature of this trip and the very remote nature of the destination, all divers are required to have dive accident insurance when diving from the **Tiburón Explorer**, and to note the policy number on their application form. Buying the appropriate travel and/or dive insurance before your holiday starts will make your vacation less stressful and more enjoyable. Here are some suggested considerations.

GENERAL INFORMATION

The information below is intended to help you assess your insurance needs, but is not meant to make representations about the coverage of any specific policy offered by an insurer or replace a consultation with a qualified insurance company representative.

There are several types of insurance in a variety of different policy configurations available to a dive traveler including (but not limited to):

- Trip interruption and cancellation insurance coverage. This covers your expenses if you can't go on or finish your planned trip due to a covered illness or unexpected circumstance. These policies are sometimes available with or without flight coverage.
- Travel assistance service coverage for things such as a lost passport
- Emergency medical costs in a foreign country
- Diver-specific accident and recompression chamber coverage
- Medical evacuation coverage
- Dive and camera gear coverage
- Rental car damage

Check your existing insurance policy(s) first. They may cover some of your needs.

When comparing possible insurance you may want to consider coverage of:

Alternative travel costs. If you need to book different transportation/accommodations due to illness or additional event.

Emergency evacuation costs

Tropical weather conditions, including hurricanes, typhoons, fires and earthquakes, as these are sometimes excluded by insurance companies as "acts of God."

Car accidents

Coverage of just you or additional family members or traveling companions

Reimbursement of prepaid expenses, such as non-refundable deposits

Does the plan have deductibles?

Must you use only preferred providers (hospitals and physicians)?

Does the plan you are considering act as primary insurance, or is it secondary to other policies you may carry?

What are the policy's coverage limits? Are they per-incident or lifetime?

How often you travel. Is a policy that covers just one trip sufficient, or do you need a longer coverage period?

DAN - DIVERS ALERT NETWORK

DAN membership provides coverage through TravelAssist for emergency situations, as well as becoming part of a worldwide network committed to scuba diving safety and injury prevention. DAN membership, renewed annually, is required for insurance.

- Individual membership
- Family membership*
- Non-US memberships

* Family membership may include spouse or significant other and all children under 24 years of age living in your household.

Once you are a DAN member, opportunities include:

- Dive Accident Insurance: DAN offers three plans, with no mileage restrictions when you use your dive accident or injury coverage. [Compare DAN plans.](#)
- Dive Equipment Insurance
- Term Life Insurance
- DAN Trip Insurance

DAN Trip Insurance Link Here :

DIVEASSURE

DiveAssure offers you PRIMARY diving accident plans as well as dive-travel insurance plans that are designed specifically for divers.

The DiveAssure advantage:

Primary coverage

Duke University oversight of diving accident cases

Travel and diving insurance in one policy

Exclusive coverage for:

Missed liveaboard departure

Lost diving days due to health, weather, mechanical breakdown and other reasons.

Lost diving equipment - reimbursement/rental allowance

Cancellation/Interruption (Curtailment) due to inability to dive

And much more

DiveAssure offers several single and family plans.

DiveAssure Link here: <https://diveassure.com/en/home/>

OTHER INSURANCE OPTIONS

The following links are to companies also providing insurance coverage, most offer general travel insurance and may not offer diving insurance.

- [Allianz Travel Insurance](#)
- [CSA Travel Protection - Insurance available online!](#)
- [Travelex](#)
- [Travel Guard](#)
- [Travel Insured](#)
- [Universal Travel Protection](#)
- [Travel Insurance - Compare and Save Today on Travel Insurance!](#)

Tiburon Explorer does not sell or endorse specific insurance policies or companies; the above information is offered as a service to our guests, but is not an exhaustive list of considerations.

What dive equipment should I bring?

SCUBA GEAR

The vessel provides tanks, weights, and weight belts for your use. If you prefer to rent the rest of your equipment from us, we have all of the equipment that you will need. Please indicate on your application form what equipment (and size) you will require. Otherwise, the following items are the diver's responsibility:

- Certification Card
- Diving Log Book (strongly encouraged)
- Mask *
- Snorkel
- Fins/Booties *
- Buoyancy Control Device (required) *
- Regulator w/alternate air source, submersible pressure and depth gauges (required)*
- Dive computer (required) *
- Dive light
- Wet suit – 5 mm to 7 mm *
- Hooded vest or hood
- Gloves
- Repair kit w/ spare parts
- Safety flag *
- DiveAlert air horn for regulator *
- Nautilus Lifeline *

Most of our guests bring their own complete set of dive gear. This is the ideal situation; however, due to weight limits or additional travel plans, some of our guests choose to rent gear. We strongly recommend that you bring your own mask, gloves, booties, fins, hood or hooded vest and computer. A personal wetsuit is also a good idea if you have space. Diving in Galapagos can be challenging, and it is important that you are comfortable. Gloves are suggested as the rocks can be sharp and can damage hand.

Is Nitrox available?

Nitrox is available for an additional charge, as long as the diver is Nitrox Certified.

What do I need to bring?

Packing for a liveaboard trip is much easier than packing for a land-based vacation. The climate doesn't require much more than shorts, T-shirts, and swimsuits, though at sea the winds can be cold and jackets are often necessary. Sunglasses, a visor/hat, raincoat, lightweight sweater or jacket, long sleeved shirt, backpack, tevas (or similar) are recommended. Soft luggage is also recommended as it takes up very little space when empty. Guests traveling through Quito who are interested in day tours may wish to bring some items of clothing for slightly cooler temperatures and good walking shoes.

Please remember that the Galapagos Islands straddle the Equator, and the sun can be very strong at times. For this reason, please make sure you have sufficient strength environmentally friendly sunscreen. In case of rough weather or if you have a tendency towards seasickness, come prepared with motion sickness medications or Transderm patches from your doctor. If you have favorite CD's or DVD's, feel free to bring them. All linens (including sheets, comforters, bath towels, hand towels, divetowels, and washcloths) are provided on board.

If possible, pack your regulator, dive computer, mask, swimsuit, change of clothes, medications and toiletries in your carry-on bag. Having these few items with you will make an unexpected luggage delay far more bearable.

There is a checked luggage limit of one bag up to 50 pounds (23 kilos) for flights between Quito and/or Guayaquil and the Galapagos. An additional fee of up to \$50* will be charged for the second bag or overweight luggage. In addition, passengers are allowed a carry-on bag weighing no more than 17.6 pounds (8 kilos) and a personal item. All additional luggage fees must be paid in cash at flight time. (**Prices could change at any time.*)

What will the meals be like?

Aboard the **Tiburon Explorer**, lunch and evening meals usually consist of salad, potatoes, rice, chicken, beef, pork, and fish. Breakfast is the usual fare of eggs, cereal, toast and fresh fruit. If you have any dietary restrictions or requests, please indicate so on your application form. Please note that specific brands of soft drinks, dressings and foods are often unavailable in the islands, and it can be very difficult for us to find low-fat or soy products and other items common elsewhere. While we will do our best to accommodate your requests, please be realistic and consider bringing some of your own items if the lack thereof may constitute a health risk or seriously compromise the enjoyment of your holiday.

Will there be a phone or communication abilities on board?

Outgoing calls may be made from the vessel via satellite phone. Please be aware that a charge is assessed for both incoming and outgoing calls.

☐ WhatsApp access is available aboard

Cellular phone calls and internet access are available when in proximity to some of the islands if your phone is so equipped. Internet cards/access and cellular phone cards are available for purchase at the airport. The connections are based on 3G network and are good for basic emails but not fast enough for large downloads. The vessel's location does determine the reliability of access to the internet.

What is the currency?

The U.S. dollar is the official currency of Ecuador; therefore, it is not necessary to purchase currency before arriving. Most major credit cards are accepted widely when shopping ashore, however, additional fees are charged in Ecuador for their use.

How do I pay for on board charges?

Though all meals, most beverages, transportation within the Galapagos, and much more is included in your trip payment, there are additional items, which you may charge to your on-board bill. These include retail items (shirts, etc.), scuba instruction, rentals, nitrox, premium alcoholic beverages, incoming and outgoing telephone calls, and crew gratuities. Other required fees include:

- *Chamber Support Fee: \$35 per person
- *Galapagos National Park fee: \$100 per person in cash
- *INGALA TouristCard \$20 per person in cash.
- *Fuel tax: \$150* per person. (**Fuel tax is included in the retail price as of July 1st, 2021.*)

Bills will be settled onboard on Sunday morning. Accumulated charges may be paid using cash, Visa, or MasterCard. American Express, travelers checks and personal checks are not accepted on board, and we are unable to advance cash on credit card charges. (Travelers checks are not accepted in Ecuador nor can they easily be changed into cash.) Credit cards are subject to the 12% VAT plus 5% in bank fees. These charges can be avoided by using cash for onboard charges. ATM machines are available in Quito, Guayaquil, Puerto Ayora and San Cristobal.

Is crew gratuity included in the package price of the trip?

Crew gratuities are not included in your package. The crew works very hard, 7 days a week and many weeks at a stretch to provide the best possible service for our guests. The industry standard for crew gratuities on dive trips is between 10% and 15% of the regular package price per passenger (if, of course, you are happy with the service which you have received). Your generosity is greatly appreciated!

What do I need to know regarding arrival and departure?

First a note about having a current Passport: Passports with a minimum of 6 months remaining before the expiration date are required for all arriving foreign nationals. If in doubt about visas, contact the Ecuadorian Consulate for specific requirements from your country.

Transfers between airport (Baltra/GPS) and vessel for same day arrivals & departures are included.. If you are arriving early and staying on Santa Cruz Island or arriving from another island, please meet the **Tiburón Explorer** at the Airport arrival area at 11:30 am. Departure from the Baltra Airport to the Tiburón Explorer is at 12:00 noon. If you miss any of your flights and are not able to make it to Ecuador or the Galapagos on schedule, please contact us at sales@humboldtexplorer.com . Notify us of your updated arrival time and where you may be reached in the meantime. The vessel will leave port on Saturday at approximately 2:00pm. Retrieving lost luggage after the vessel departs on charter is impossible. It can be retrieved when the vessel returns to port at the end of the charter.

The vessel arrives at its final destination port on Saturday morning. The Friday evening meal is on the island and is not included in the price of the trip. Transportation is organized and included for transfer to the airport. The departure tax from Quito and Guayaquil is now included in international flight prices.

Please note: Flight times, prices and the Galapagos airport of arrival are all subject to change with little or no notification, and flights often run late. We strongly encourage our guests to plan on arriving at least one and preferably two days prior to your flight to the Galapagos Islands, to ensure that your luggage is with you or to make up for any travel delays. We also recommend that guests plan on an extra night in Quito or Guayaquil before departing Ecuador. The earliest time a guest can reliably expect to connect to another flight is 5 pm on the last Saturday of the trip from Guayaquil or 7 pm from Quito. Ticket holders are required to check-in a minimum of three hours prior to flight time for all international departures, even when connecting from an Avianca or Latam flight. If you are booking your own domestic flights, the **Tiburón Explorer** departs from Baltra (GPS), not San Cristobal (SCY). Passengers flying into San Cristobal must arrange their own transportation to Baltra.

What if our flight is delayed?

If you miss any of your flights and are not able to make it to the **Tiburon Explorer** on schedule, please contact us at sales@humboldtexplorer.com.

Notify us of your updated arrival time and where you may be reached in the meantime.
